

SUPER BLUE FLEX HOSE

Applications

The blue line is known worldwide as a mark of Irritrol System quality in irrigation. This same quality can be found in Super Blue Flex Hose. Ideal for installing sprayheads (especially in difficult conditions) because it is extremely flexible, easy to handle and to use.

Features

- Very low density polyethylene
- Maximum working pressure, 5,5 bar at 35°C
- Reel length: 30 metres
- Inside tube diameter 12,5 mm.
- Minimum wall thickness 2,4 mm.
- Shrink-wrapped coils
- Compatible with all fittings ranges of: Olson E-Z-Ell, Dura, Toro, Rain Bird and many others.
- The reels are wound to allow unwinding from center of coil.
