

100 CENTURY PLUS

Features

- Globe/angle configuration (G/A)
- Accepts Irritrol OmniReg pressure regulator
- Female thread BSP 1" - 1½" - 2" - 3" (NPT available on request)
- Flow control (FC)
- Brass flow control stem (2" and 3" mod.)
- Internal and external manual bleed
- Body and cap in Nylon reinforced with fiberglass (30%)
- Molded-in brass studs allow positive bonnet attachment
- Captive Solenoid (the plunger is retained in the solenoid)
- Slow, anti water hammer closing
- Rugged, nylon-reinforced Buna-N double-beaded diaphragm
- O-ring gasket on unused inlet cap guarantees hermetic seal and does not require Teflon
- Self-cleaning control orifices
- Working pressure: 0,7 to 13,8 bar
- Solenoid 24VAC 50Hz (24VAC 60Hz on request)
- Inrush current, 0,34 Amp.
- Holding current, 0,20 Amp.

Code

IT-VHH02500	104 Series - 1" hydraulic control
IT-VHH04000	104 Series - 1 ½" hydraulic control
IT-VHH05000	104 Series - 2" hydraulic control
IT-VHH08000	104 Series - 3" hydraulic control

Features

Hydraulic control valve

- Normally open. An external pressure maintains it in the closed position
- It can be connected in parallel to electric valves to avoid the use of large valves and to save cable
- It accepts a control capillary with a 4 mm inside diameter
- Female thread BSP: 1" - 1½" - 2" - 3".
